

UEA Campus Conservation Programme

About 25 people attended the launch of this project on October 13th, including UEA staff and students; YVS and CPRE representatives, and members of the public who enjoy walking on the campus and in the Yare Valley.

There are opportunities for anyone with an interest in wildlife and conservation to participate – no matter what their level of technical or physical aptitude or time availability!

Activities vary from observing wildlife, to litter picking, to designing signage or guiding walks, and the University is very keen for the local community to be involved throughout 2010 and 2011.

Anyone interested should contact Elaine Sherriffs on 01603 592103, or E.Sherriffs@uea.ac.uk
